

## VIDEO PRODUCTION

Monkey Wrench Studio, Inc. has the expertise to tell your story so that the viewer not only understands your message, but they are engaged by the content of your story. By utilizing live action, animation or motion graphics, we visually draw the viewer in to what makes you, your product, or your brand stand out above your competitors. Bottom line - we can help tell your story through video!

Monkey Wrench Studio can handle most production needs from early pre-planning (concepts, story boards, animatics), to day of shooting (directing, talent coaching, camera work, green screen, lighting, make up), followed by post production (color correction, tracking, voice and music overlay, motion graphics, 2D/3D animation).
